ABOUT

Technology professional with 2+ years of experience at the innovation hub of Brazil's largest retail group in the North/Northeast region (Grupo Mateus). Worked across QA, backend development, business analysis and product design, always bridging the gap between client pain points and delivered solutions. Advanced proficiency in Figma, with hands-on experience in design systems, high-fidelity prototyping and end-to-end product workflows. Currently UX Analyst, with an ongoing postgraduate degree in Software Architecture (FIAP/Postech). Advanced English and Spanish speaker.

PROFESSIONAL EXPERIENCE

UX Analyst

Pulse — Technology & Innovation Hub of Grupo Mateus · São Luís, Brazil

September 2026 – Present

- Responsible for UX/UI strategy and execution across Mateus Mais ecosystem products, covering B2C (e-commerce), B2B (sales-force platform) and internal operational dashboards.
- Created high-fidelity prototypes in Figma, from wireframes to full design systems, delivered for app, desktop and responsive web, with mastery of auto layout, variables, components and instances.
- Prototyped based on technical documentation: analysed API contracts and third-party endpoint specs to define data structure and screen content.
- Led end-to-end product workflows: from identifying pain points with stakeholders to handoff specifications and development oversight.
- Developed front-end features for the Mateus Mais platform with HTML, CSS and Angular, using AI-assisted tools (Claude Code and Codex).
- Actively participated in agile ceremonies (Scrum and Kanban): planning, review and retrospective sessions.

Business Analyst / Product Designer

Pulse — Technology & Innovation Hub of Grupo Mateus · São Luís, Brazil

August 2024 – August 2026

- Worked with a scope comparable to a Product Owner: participated in meetings with managers, directors and the president of Grupo Mateus, representing the Mateus Mais platform.
- Independently gathered requirements directly from clients and internal stakeholders, identifying pain points and translating them into product solutions.
- Filled the design gap within the team: solely responsible for all visual design of new products during periods without a dedicated designer, creating flows, wireframes and functional prototypes for development and client presentations.
- Managed full delivery cycles: specification, development, testing, UAT and client presentation.
- Delivered training sessions for operators and sales staff across all Grupo Mateus regional offices (MA, PA, PI, CE, PE, BA, TO, RE), with online sessions of up to 60 simultaneous participants and in-person sessions of up to 30 people.
- Special project (Aug–Oct 2024): seconded to the Group's HR department to validate and deliver training for a new Oracle workforce management system.

Intern — QA & Backend Developer

Pulse — Technology & Innovation Hub of Grupo Mateus · São Luís, Brazil

March 2024 – August 2024

- Performed end-to-end, regression, load (JMeter and Locust) and automated tests (Cypress and Selenium) for Mateus Mais releases.
- Contributed to backend development using Django and FastAPI on the "Accounts" module, responsible for managing all users across the Mateus Mais ecosystem (B2C e-commerce, POS, field sales, dark store, counter sales and partner channels).
- Gained hands-on experience with AWS, REST APIs, JWT, Git and Angular on the frontend.

EDUCATION

FIAP / Postech

Postgraduate Degree in Software Architecture

2025 – Ongoing

UNDB University Center — São Luís, Brazil

Bachelor's Degree in Software Engineering

2020 – 2024 · Graduated in 2024.2

Thesis: Software Testing — Ensuring Quality in System Development

UNDB University Center — São Luís, Brazil

Bachelor's Degree in Information Systems

2020 – 2024 · Graduated in 2024.1

Thesis: Home Automation — Exploring IoT Applications in Residential Environments

Lincoln B. Johnson School — Barranquilla, Colombia

Elementary School (full English immersion)

2009 – 2012

American School — Barranquilla, Colombia

Elementary School (full Spanish immersion)

2009

COURSES & CERTIFICATIONS

- **Alura** · UX Design — Fundamentals and Process of User Experience Design
- **Alura** · Figma — From Basics to Advanced Design Systems (auto layout, variables, components)

SKILLS

Design & Prototyping	Figma (advanced), Design Systems, Auto Layout, Variables, Responsive Design, FigJam, Miro, Canva
Methodologies	Scrum, Kanban, Agile Ceremonies, Discovery, Briefing, Product Scoping
QA & Testing	End-to-End, Regression & Load Testing (JMeter, Locust), Cypress, Selenium
Development	HTML, CSS, JavaScript, Django, FastAPI, Angular, REST APIs, JWT, AWS, Git
AI-Assisted Dev	Claude Code, OpenAI Codex — AI-assisted design and front-end development
Domains	B2C e-commerce, B2B sales platforms, internal tools, SaaS
Languages	Portuguese (native) · English (advanced) · Spanish (advanced)
